Video Quality and Image Rollover Adjustment

In the device main screen, click "V," "I," "T" to view full screen mode of camera's live feed. Click "V," "I," "T" to open the "Video Quality" and "Change Screen View" adjustment window. To adjust the video quality, drag the slider to the right to increase clarity and to the left to decrease clarity. To change screen resolution, one of the four size options for the desired effect.

Use commonly practiced methods to determine proper wire gauge based on wire length, current, and wire tables. You may also trim the power cable supplied with the A60 to reduce overall wire length. Only use enough wire to connect the unit to the power source, including a service loop.

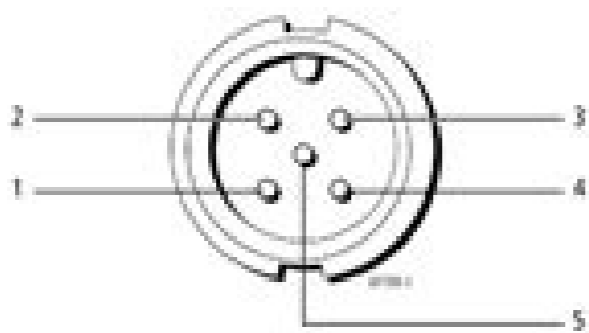

Note: When the A60 has been powered off using the PWR key but is still electrically connected to the power supply, the GPS continues to draw current. The supplied power cable has a cross section of 10 mm.

CAUTION: Correct Polarity
If the power connections are accidentally reversed the system will not work. Use a multimeter to ensure that the input power leads are connected for correct polarity.

NMEA Cable (R08004)

The 5-pin, 1.5m (5 ft) NMEA input cable is supplied with exposed wire connecting tails. These should be connected to your existing NMEA instruments using suitable connector blocks as follows:

Function	Color	Pin no.
NMEA Input (-ve) common	Green	1
NMEA Input (+ve)	White	2
NMEA Output (+ve)	Yellow	3
NMEA Output (-ve) common	Brown	4
Not connected	Screen	5

GPS Cable

Connect the 6-pin RS12 cable to the left-most connector, labeled GPS.
