As a whole product line of cross-platform internet security applications, it offers a wide range of software that caters to different types of users. If you're looking for something that fits the needs of a small business, Avast Small Office Protection is recommended. This app features robust real-time protection for minimal user maintenance—exactly what most small teams need to improve productivity. From ransomware to phishing, this mobile security app offers a next-generation antivirus system that can protect customer data and sensitive information, as well as prevent disastrous data breaches. Additionally, it has multi-OS support to let you install it on most common platforms. No matter the platform versions are mostly similar in their core features. The app can block malware and verify if any URLs are safe to open. However, there are still some differences with the tools offered. For this mobile version, it can secretly capture images and audio clips of whoever stole your smartphone or tablet. Its anti-theft feature helps you track down your lost or stolen device, too, and can remotely lock or wipe its data in case the thief changes its SIM card. Additionally, your files and apps can be locked with either a PIN code, pattern, or fingerprint. Your photos have their own encrypted vault. If you're having trouble with space, it has a tool for freeing up junk files. It can even boost your speed and increase your battery life. One interesting feature the mobile app has over the PC versions is that it comes with a built-in VPN. This helps in keeping your team's online activities anonymous and lets you check the security of any network. For Avast Small Office Protection's license, it can be installed on up to 10 devices for an annual subscription plan of either one years, two years, or three years. The devices can be either PC or mobile. However, this device limit can't be upgraded so you'll have to look at other Avast Business products for more coverage. Another downside to this security software is that there's no free trial available to see if it suits your exact needs. There's still a 30-day money-back guarantee, though. A little tool with big featuresAll in all, Avast Small Office Protection is definitely designed to be an easy-to-use mobile security app. Not only does it feature cross-platform capabilities for its antivirus and web protection, but its other tools also focus on protecting your device if it ever gets lost or stolen.
